Summary

Computer Science undergraduate building toward full-stack software engineering, with hands-on experience across backend systems, frontend development, REST APIs, and database-backed systems. Skilled in Java/Spring Boot with Spring Security and JWT authentication, HTML/CSS/JavaScript frontend development, and Python-based machine learning projects involving NLP and semantic embeddings. Focused on building real, deployable software rather than isolated coursework exercises.

Technical Skills

Languages: C, C++, Java, Python, JavaScript, SQL

Frontend: HTML, CSS, JavaScript, Tailwind CSS

Backend: Java, Spring Boot, Spring Security, REST APIs, JWT Authentication, Role-Based Access Control

Databases: MySQL

Tools & DevOps: Git, GitHub, Maven, Docker, Swagger/OpenAPI

Machine Learning: Python, Pandas, NumPy, Scikit-learn, Sentence-BERT (SBERT), XGBoost, Gradio

Projects

Community Health Checkup & Tele-medicine Portal — Backend **GitHub**

Java, Spring Boot, Spring Security, MySQL, Maven, Docker

- Designed a layered backend architecture (Controller / Service / Repository) in Spring Boot to manage patient, doctor, and admin workflows for a community healthcare and telemedicine system.
- Implemented stateless authentication with Spring Security and JWT, enforcing role-based access control across Admin, Doctor, and Patient roles to secure every REST endpoint.
- Built RESTful APIs for appointment management and health utilities (BMI calculation, glucose tracking), documented the API surface with Swagger/OpenAPI, and containerized the service with Docker alongside a MySQL database.
- Integrated the Jitsi Meet API to support real-time video teleconsultation sessions between doctors and patients.

Community Health Checkup & Tele-medicine Portal — Frontend **GitHub**

HTML, CSS, JavaScript, Tailwind CSS

- Built a fully responsive single-page frontend with distinct role-based dashboards for Patient, Doctor, and Admin, translating backend workflows into a clear, usable interface.
- Developed the appointment booking and teleconsultation flow end-to-end, generating dynamic Jitsi Meet video-call links so patients and doctors could connect directly from the dashboard.
- Structured client-side navigation and interactivity in vanilla JavaScript to keep the application lightweight and dependency-free while integrating cleanly with the backend API.

Smart Bachelor Life
Team Capstone Project — Private Repository

- Collaborative software project developed with a team; repository is private and shared with teammates.

ATS Score Prediction **GitHub**
Python, Sentence-BERT, XGBoost, Scikit-learn, Gradio

- Built a regression pipeline that converts resumes and job descriptions into 384-dimensional Sentence-BERT embeddings, concatenating them into 768 combined features to predict a numerical ATS compatibility score.
- Trained and compared Linear Regression, KNN, Random Forest, and XGBoost regressors using 5-fold cross-validation, selecting XGBoost as the final model based on validation performance.
- Tuned XGBoost hyperparameters via cross-validation and deployed the model through a Gradio web interface on Render for interactive resume-to-job-description scoring.

Experience

Udvashito Shikhanir Coaching Center **March 2024 – Present**
English Teacher, Grades 8–10 *Dhaka, Bangladesh*

- Plan and deliver structured English lessons for grades 8–10, adapting content and pace to different learning levels.
- Build clear presentations and written materials, strengthening documentation and communication skills applicable to technical work.

Samit Coaching Center **Jan 2023 – April 2023**
English Teacher, Grades 7–10 *Dhaka, Bangladesh*

- Taught English to grades 7–10, managing curriculum planning and student progress tracking.

Education

Bangladesh University of Business and Technology (BUBT) **2023 – 2027**
Bachelor of Science (Honours) in Computer Science & Engineering *CGPA: 3.54 / 4.00 (Running)*

Notre Dame College, Mymensingh **2021**
H.S.C (Science) — Mymensingh Board *GPA: 5.00 / 5.00*

Ghatail Govt. High School **2019**
S.S.C (Science) — Dhaka Board *GPA: 4.78 / 5.00*

Achievements

- Participated in 3 intra-university programming contests.
- Participated in a university-organized hackathon.
- Led the student debate team in the National English Olympiad (2021).
