## Summary

Computer Science undergraduate building toward full-stack software engineering, with hands-on experience across backend systems, frontend development, REST APIs, and database-backed systems. Skilled in Java and Spring Boot, Spring Security and JWT authentication, frontend development, and Python-based machine learning projects involving NLP and semantic embeddings. Focused on building practical, deployable software.

## Technical Skills

**Languages:** C, C++, Java, Python, JavaScript, SQL

**Frontend:** HTML, CSS, JavaScript, Tailwind CSS

**Backend:** Java, Spring Boot, Spring Security, REST APIs, JWT Authentication, Role-Based Access Control

**Databases:** MySQL

**Tools & DevOps:** Git, GitHub, Maven, Docker, Swagger/OpenAPI

**Machine Learning:** Python, Pandas, NumPy, Scikit-learn, Sentence-BERT (SBERT), XGBoost, Gradio

## Projects

- **Community Health Checkup & Tele-medicine Portal — Backend** GitHub
  *Java, Spring Boot, Spring Security, MySQL, Maven, Docker*
  - Designed a layered Spring Boot backend to support patient, doctor, and administrator workflows for a community healthcare and telemedicine system.
  - Implemented stateless JWT authentication and role-based access control for Admin, Doctor, and Patient roles.
  - Built REST APIs for appointments and health utilities, including BMI calculation and glucose tracking; documented endpoints with Swagger/OpenAPI and containerized the service with Docker and MySQL.
  - Integrated Jitsi Meet for real-time video consultations between doctors and patients.
- **Community Health Checkup & Tele-medicine Portal — Frontend** GitHub
  *HTML, CSS, JavaScript, Tailwind CSS*
  - Built a responsive single-page interface with role-based dashboards for patients, doctors, and administrators.
  - Developed appointment booking and teleconsultation flows with dynamic Jitsi Meet call links.
  - Implemented lightweight client-side navigation and interactions in vanilla JavaScript and integrated the frontend with the backend API.
- **Smart Bachelor Life**
  *Team Capstone Project — Private Repository*
  - Collaborated with a team to develop a software capstone project; the repository is private and shared with teammates.
- **ATS Score Prediction** GitHub
  *Python, Sentence-BERT, XGBoost, Scikit-learn, Gradio*
  - Built a regression pipeline using 384-dimensional Sentence-BERT embeddings for resumes and job descriptions, combined into 768 features to predict ATS compatibility scores.

- Compared Linear Regression, KNN, Random Forest, and XGBoost with 5-fold cross-validation; selected XGBoost based on validation performance.
- Tuned XGBoost using cross-validation and deployed an interactive Gradio application on Render.

## Experience

**Udvashito Shikhanir Coaching Center** March 2024 – Present
*English Teacher, Grades 8–10* Dhaka, Bangladesh

- Plan and deliver structured English lessons, adapting materials and pace to different learning levels.
- Prepare presentations and written materials, applying clear communication and documentation skills.

**Samit Coaching Center** Jan 2023 – Apr 2023
*English Teacher, Grades 7–10* Dhaka, Bangladesh

- Taught English and supported curriculum planning and student progress tracking.

## Education

**Bangladesh University of Business and Technology (BUBT)** 2023 – 2027
Bachelor of Science (Honours) in Computer Science & Engineering
CGPA: 3.54 / 4.00 (Running)

**Notre Dame College, Mymensingh** 2021
H.S.C. (Science), Mymensingh Board GPA: 5.00 / 5.00

**Ghatail Govt. High School** 2019
S.S.C. (Science), Dhaka Board GPA: 4.78 / 5.00

## Achievements

- Participated in three intra-university programming contests.
- Participated in a university-organized hackathon.
- Led the student debate team in the National English Olympiad (2021).

## Languages

Bangla (Native) | English (Conversational) | Hindi (Conversational) | French (Basic)

## Declaration

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief.
